

ENTERPRISE DATA INTEGRATION

Your business agility depends on how fast you can access your complex data

Data Warehousing **Modernization**

Leverage pre-built solutions, accelerators, and certified cloud engineers and architects to help you in your data warehouse modernization journey.

Comprehensive life-cycle services for modernizing data warehouses, including technology strategy, solution architecture, proof of concept, production implementation, and ongoing support.

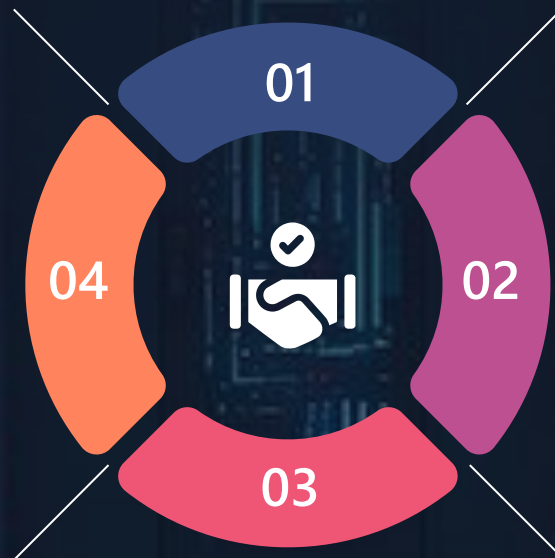

What We Deliver

Modernizing ETL
Process

Building Modern
Data Lake

AI & ML-powered
Solutions & Services

Migration of Big
Data to Cloud

Master Data Management

End-to-end solutions and services for Master Data Management (MDM) offer Consulting, Data Quality Management, and Digital Transformation with operation support. Our Master Data Management (MDM) program delivers benefits and faster results by streamlining operations with a quick turnaround.

Our Three-pronged Approach Focusses On

Data
Consolidation

Data
Quality

Data
Analytics

Data Quality & Governance

Data governance involves implementing game-changing data-driven strategies that accurately manage risk, increase operational efficiency, and evolve financial performance, all by harnessing the enormous amount of data at an enterprise's disposal.

How We Deliver Data Quality & Governance Services

Discover and map the data flow for accessibility, reliability, and security

Integration with technology systems and applications to govern data usage

Well-defined processes to manage the scale and complexity of datasets

Data Migration

Data spread across multiple systems requires data synchronization and faster data-driven decision making. Our services aim to automate and streamline data through a combined strategy involving methodology, resources, and technology.

Our Offerings

Turn-key Data
Migration

Data

Compliance

Risk
Assessment

Data Management

Harness the full potential of your data assets to transform raw information into actionable insights. Our data management services ensure data consistency, reduce duplication and provide a reliable foundation for various business processes.

How We Can Help

Integrate data from databases, applications, & third-party systems

Robust backup and disaster recovery strategies

Optimize storage and retrieval of historical data

Migrate your data to secure and scalable cloud environments

Data Center Modernization

Embark on a seamless data modernization journey that empowers your organization for a digitally transformative future. We offer a comprehensive set of solutions that enhance your data center's performance, reliability, and scalability while reducing operational costs.

Our Offerings

Assessment and
Strategy Development

Data Center
Consolidation

Cloud Migration

Business Continuity
Planning

Managed Data Services

Our Managed Data Services handle your organization's data needs, from data storage and processing to data analytics and insights. We ensure that your data is handled securely, efficiently, and in a way that adds value to your business.

Our Offerings

Data Processing
and ETL
